

## WESTERN GRAPHICS & DATA OPENS NEW PORTLAND FACILITY

**May 15th, 2008**

### **PORTLAND, OR -**

Western Graphics & Data, which produces packaging and data processing services for the prepaid card industry, is moving to a new facility in SE Portland. The highly secure facility is designed to allow secure packaging of financial cards and is the only facility of its kind in the Pacific Northwest.

As a result of significant investment in equipment and electrical and security systems, the new facility will exceed the security standards of many of the world's largest financial institutions.

"In order to better address the needs of our customers and thanks to business growth, we decided to move into a new facility that could provide the highest standards of security required by our customers," said Scott Mitton, general manager of Western Graphics & Data.

The new 44,000 square foot space is part of the Foster/205 Commerce Center. PhotoCraft, another Portland division of IGH Solutions, will become the new tenant of Western's former location at NW Yeon.

Western Graphics & Data will be hosting an open house at their new facility on Friday, May 16th, from 1pm - 6pm. For more information, please contact Scott Mitton at (503) 222-1731.

### **ABOUT WESTERN GRAPHICS**

Western Graphics & Data, an IGH Solutions Company, offers industry-leading design and manufacturing expertise in creating standard and custom prepaid card packaging from initial concept to individual consumer personalization and fulfillment.
